

System-Wide Design Standards

Table of Contents

	<i>Page</i>
1 INTRODUCTION.....	1-1
1.1 Overview.....	1-1
1.2 Document Purpose	1-2
1.3 Relationship to Other Documents	1-2
1.4 Document Organization.....	1-2
2 FRAMEWORK FOR BLUEPRINT DELIVERY	2-1
2.1 Introduction.....	2-1
2.1.1 IT Initiatives Defined.....	2-1
2.1.2 Assumptions.....	2-2
2.2 IT-Related Activities Within SFA.....	2-3
2.2.1 SFA Modernization Blueprint.....	2-4
2.2.2 IT Investment Management	2-4
2.2.3 ED/System Life-Cycle Development Methodology.....	2-4
2.2.4 Enterprise Encyclopedia Management	2-5
2.2.5 Acquisition Management.....	2-5
2.2.6 Enterprise Configuration Management.....	2-5
2.3 Framework Elements.....	2-6
2.3.1 Architecture Management.....	2-6
2.3.2 Change Management	2-8
2.3.3 Investment Management.....	2-9
2.3.4 Configuration Management	2-10
2.3.5 Acquisition Management.....	2-11
2.3.6 Systems Development Life Cycle Methodology.....	2-12
2.3.7 Technology Tools and Standards	2-13
2.4 Framework Requirements.....	2-14
2.5 Framework Processes	2-16
2.5.1 Annual Budget Cycle.....	2-16
2.5.2 IT Initiatives of a More Urgent Nature.....	2-23
2.5.3 Detailed Framework Process Steps	2-27
2.6 Technology Tools and Standards	2-29
2.6.1 Technology Tools.....	2-29
2.6.2 Repositories.....	2-30
2.6.3 Systems Development Life Cycle: Methodology, Documentation, and Techniques	2-31
2.6.4 Models	2-40
2.6.5 Managing the Framework Standards	2-41
2.6.6 Exceptions to the Framework Standards	2-41
2.7 Progress to Date	2-42
3 SECURITY REQUIREMENTS	3-1
3.1 Introduction.....	3-1
3.2 Information Systems Security Overview	3-2

3.2.1	Overview of Information Systems Security	3-2
3.2.2	Overview of Current SFA Systems Security	3-14
3.3	Security Requirements.....	3-16
3.3.1	Security Policy and Management Requirements.....	3-17
3.3.2	Physical Asset Security Requirements	3-19
3.3.3	User Types and Access Rights Requirements	3-26
3.3.4	User Authentication and Authorization Requirements	3-43
3.3.5	User Account Maintenance Requirements.....	3-53
3.3.6	Data Transportation and Encryption Security Requirements.....	3-55
3.3.7	System Security Auditing Requirements	3-66
3.3.8	Additional Topics	3-68
3.4	Security Awareness	3-82
4	PERFORMANCE REQUIREMENTS.....	4-1
4.1	Introduction to Performance Requirements	4-1
4.2	Assumptions.....	4-2
4.3	High-Volume and Performance Sensitive Transaction Classes	4-3
4.3.1	Online Updates with High-Volume Activity	4-4
4.3.2	Transactions with Long, Complex Access Paths	4-4
4.3.3	Transactions that Access Entity Types with Combined High Level of Activity when Accounting for All Transactions Against the Entity Type	4-4
4.3.4	Groups of Transactions that Will Execute Together and Impact Each Other	4-5
4.4	Project EASI/ED Performance Requirements	4-6
4.4.1	Concurrent User Requirements	4-6
4.4.2	Response Time Requirements.....	4-7
4.4.3	System Performance Requirements.....	4-10
4.4.4	Data Management Requirements	4-11
4.4.5	Backup Requirements.....	4-12
4.4.6	Recovery Requirements.....	4-13
4.4.7	Availability Requirements	4-14
4.4.8	Reliability Requirements	4-15
4.5	High-Level Performance Issues for Reused Title IV Systems.....	4-16
5	INTERFACE STANDARDS AND STRATEGY.....	5-1
5.1	Project EASI/ED Interface Standards	5-1
5.1.1	Assumptions.....	5-3
5.1.2	File Transfer	5-4
5.1.3	Internet	5-9
5.1.4	Electronic Mail	5-14
5.1.5	Interactive Voice Response	5-16
5.1.6	Facsimile	5-17
5.1.7	Paper	5-18
5.2	Project EASI/ED Interface Strategy.....	5-19
5.2.1	Assumptions.....	5-20
5.2.2	Timeliness Requirements	5-20
5.2.3	Synchronization Techniques	5-20
5.3.4	Recommendations.....	5-26

6	USER INTERFACE STANDARDS	6-1
6.1	Introduction.....	6-1
6.2	User Interface Standards Overview.....	6-1
6.2.1	Overview of User Interface Components and Standards	6-1
6.2.2	Regulatory and Government User Interface Standards and Guidelines	6-21
6.3	Project EASI/ED User Interface Requirements and Design Goals	6-22
6.3.1	User Interface Requirements.....	6-22
6.3.2	Design Goals	6-25
6.4	Project EASI/ED User Interface Standards	6-28
6.4.1	Project EASI/ED User Interface Component Standards.....	6-28
6.4.2	Project EASI/ED Web/Internet Application User Interface Model and Navigation Strategy	6-47

APPENDIX A: Acronyms and Definitions

APPENDIX B: References

APPENDIX C: Framework Elements

APPENDIX D: Technology Tools and Standards

APPENDIX E: Access Rights Subject Area Definitions

APPENDIX F: High Volume and Performance-Sensitive Transaction Classes and Concurrent Usage Assumptions

APPENDIX G: Interface Standards

APPENDIX H: Interface Strategy

APPENDIX I: User Interface Format and Style Guide
